EXPERIENCE

Senior IT Infrastructure & Security Manager

2019-05 – Present

Fortune 500 Insurance

- Led the company's "cloud-first" migration of 40+ production applications to AWS, improving uptime to 99.99% and delivering strategic cost optimization.
- Developed and enforced the cybersecurity framework, successfully passing all internal and external audits and supporting risk-based decision making.
- Managed a team of 8 infrastructure and security engineers, fostering stakeholder collaboration across business units.
- Oversaw the incident response team during security events, minimizing business impact and ensuring continuity of operations.

Systems & Network Engineer

2015-04 – 2019-05

Regional Logistics Firm

- Managed and maintained the company's IT infrastructure, including Windows servers, Linux servers, and Cisco networking equipment.
- Implemented a new vulnerability management program using Tenable, enhancing security insight and reporting.

EDUCATION

Bachelor of Science, The Hong Kong Polytechnic University (PolyU)
